

## Geiger-Mueller Tubes

Pycko Scientific Ltd are able to offer the complete range of LND, Inc. Geiger-Mueller tubes

If your GM tube is not manufactured by LND, for example by Centronics, as long as we know the type we can usually cross reference to an LND equivalent GM.

Product development is at the core of LND's expertise. If one of their standard detectors does not meet your design specifications, *LND* will design a detector that exactly matches your requirements. Please contact Pycko Scientific and allow us to help match the proper detector to your application.

We can provide many of the tubes used in common Health Physics monitoring equipment, for example from Mini Instruments, NE, Thermo Fisher, Ludlum and many more.
