

## Pycko Air Sampler

### Introduction

This extremely reliable free piston vacuum pump is compact, lightweight, quiet, and vibration free. Having a uniquely simple and reliable design it has no complicated transmission components such as crankshafts, connecting rods, or ball bearings, typically found in conventional pump designs.

#### Specification:

- L60PS can sample at up to 60 litres per minute
- an integral flow gauge to show the level of flow during use
- an elapsed time indicator to determine run times

Available in 240v or 110v versions

#### Weight:

L60 – 8kg
