Scintillation Crystals

Pycko Scientific Ltd supply Scintillation Crystals for the Mini Monitor 44 and 42 range of instruments.

High quality synthetic crystals for infrared spectroscopy and X and gamma ray detection.

Materials such as Potassium Bromide, Sodium Chloride, Potassium Chloride, Calcium Fluoride etc. are available for infrared optics up to several tens of centimeters in size.

X ray detector materials suitable for x and gamma ray detection and imaging such as Sodium Iodide, Cesium Iodide, Bismuth Germanate, Cadmium Tungstate, Zinc Tungstate, etc. are available in a variety of geometries including 2 dimensional and linear arrays with pixel sizes as small as 75 microns.

Most products can be supplied with short lead times to custom design requirements

We also provide cables for the Mini Monitor 44 and 42 range of instruments.
